Re: Special Waste Approval Update
Gary Development Landfill

Dear Mr. Oliver:

This letter acknowledges the letter dated April 5, 1983, requiring us to update our approval for sludge disposal at Gary Development Landfill.

Enclosed please find copies of two applications and associated paperwork to Waste Management for approval to dispose of our central treatment plant and terminal treatment plant sludges at CID and Wheeler. Included are the approvals from Indiana and Illinois. All the information contained in the applications is still pertinent. Neither the processes generating the wastes nor the quantities generated have changed. 15,015 yards of terminal treatment plant sludge and 8,014 yards of central treatment plant sludge were disposed of at Gary Development Landfill during 1982.

The titzel unit oil sludge information will be sent as soon as it is completed.

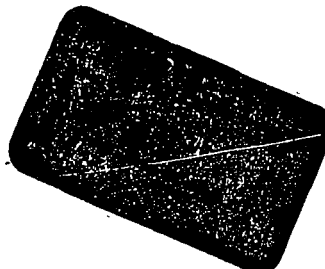

In addition to permits for disposal at Gary Development Landfill, we also request renewal of our permits to dispose of central treatment plant and terminal treatment plant sludges at Wheeler Landfill.

Should you require any additional information, feel free to contact Mr. Charles Epstein of this office at 219/391-2578.

Very truly yours,

C. Broman
